

# The Calculating Method of GPA in Chinese-English Transcripts of University of Electronic Science and Technology of China

University of Electronic Science and Technology of China has adopted the following method to calculate the grade point average (GPA) in Chinese-English transcripts since June 1, 2014.

## 1.The calculating method of every grade point system

Point System	Result	Corresponding scores in percentile system	Corresponding grade points	Remarks
Percentile System	85~100	/	4	One point is 0.1.
	60~84	/	1.5~3.9	
	Under 60	/	0	
Chinese Five-level System	Excellent	95	4	
	Good	85	4	
	Average	75	3	
	Pass	65	2	
	Fail	55	0	
English Five-level System	A	95	4	The corresponding percentile scores of A+,A- are floating up or down 2 points, which is the same as other levels.
	B	85	4	
	C	75	3	
	D	65	2	
	E	55	0	
Two-level System	Pass	85	4	
	Fail	0	0	

The calculation of other grade points under different point system is identified by the Office of Academic Affairs and related college.

## 2.Calculating formula of GPA

$$\text{Grade Point Average (GPA)} = \frac{\sum (\text{Corresponding credits} \times \text{Corresponding grade points})}{\sum (\text{Corresponding credits})}$$

## 3.Remarks

Prior to September 1, 2014, the old calculating method of GPA is still adopted in Chinese-English transcripts issued by the archives for grade 2010.
